

# Herringbone A + B panels

## fold down installation system

5G H/B Duo is a traditional installation system using A + B panels to deliver robust, long-lasting herringbone flooring.

### Robust two-panel solution

Herringbone flooring is a timeless favourite, and its elegant pattern is a highly appreciated feature in modern homes and interiors. While installation has traditionally been demanding, our 5G H/B Duo makes the process fast, precise and reliable.

### Proven performance. Perfected for herringbone.

Based on our market-leading 5G Fold Down system, 5G H/B Duo delivers the same fast, easy and reliable installation experience.

Unlike the standard 5G system, the herringbone version features a locking insert on the long side of the panel, enabling fast installation and more robust results across all materials.

### Designed for dismantling and reinstallation

Panels can be easily dismantled using the 5G dismantling pin. This makes correcting mistakes during installation quick and risk-free. It also allows the floor to be removed and reinstalled elsewhere, supporting circularity and sustainability by extending use and reducing waste.

Easy to dismantle - panel by panel.  
Available with leakproof joints.

### Robust results

A reliable technology ensuring precise and robust connections, reducing the risks of panel movement and shifting.

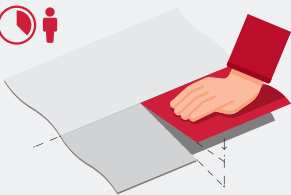

### Effortless dismantling

Easy dismantling simplifies error correction and panel replacement during installation and enables effortless panel reuse.

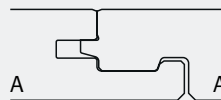

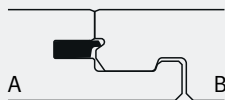

### Easy installation

Based on the user-friendly 5G Fold Down technology, installation is fast, easy and reliable.

### FOLD DOWN INSTALLATION

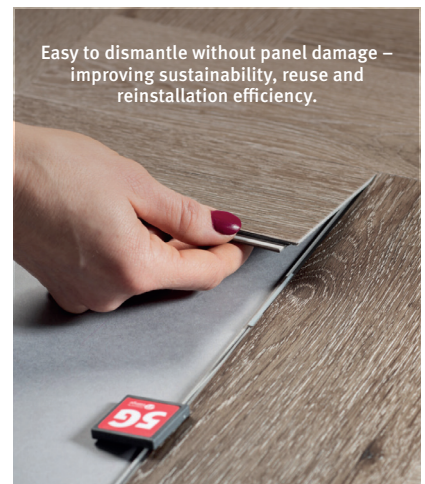

### PROFILE EXAMPLES

How it works!

5G H/B Duo ensures strong, reliable connections – reducing the risk of panel movement and shifting.

Easy to dismantle without panel damage – improving sustainability, reuse and reinstallation efficiency.
